Jul 17, 2012

Research and Markets has announced the addition of John Wiley and Sons Ltd's new book "The Children of Eve: Population and Well-being in History" to its offerings.

In a release, Research and Markets noted that report highlights include:

The Children of Eve is the first book to bring together general material about population and well-being in a single volume. It presents a world history of demographic and economic change that ranges broadly over time and space and which emphasises the commonality of human experience.

- The first book to put together material about population and well-being in a single volume
- Emphasizes the formative population history of Europe and North America over the years since the Middle Ages, and includes discussions of Asia and the southern hemisphere
- The authors successfully maintain the difficult balance of addressing complex issues in a style that doesn't over-simplify the subject, whilst upholding an approach that is accessible to general readers and students
- Designed to work as both a stand alone text or a supplement to textbooks in any number of courses

Author Information:

Louis P. Cain is Professor of Economics at Loyola University Chicago, Adjunct Professor of Economics at Northwestern University, Senior Investigator at the Center for Population Economics, University of Chicago, and Research Economist at the National Bureau of Economic Research. He received his Ph.D. from Northwestern. With the late Jonathan Hughes, he is the author of American Economic History, now in its 8th edition (2011).

Donald G. Paterson is Professor Emeritus of Economics at the University of British Columbia. He received his D.Phil from the University of Sussex and held a post-doctoral fellowship at the University of Cambridge. He is the author (with William L Marr) of Canada: An Economic History (1980) and has published widely in the areas of history of international investment, economic history of natural resource use, history of US technical change, macro-economic history of Canada, and business history.

Cain and Paterson previously co-authored two articles on biased technological change in The Journal of Economic History.
