GTC is proud to present the Immune Responses in Tumor Microenvironment Workshop to be held on Jan 30, 2013 in San Diego, CA.

The Workshop: Immune Responses in Tumor Microenvironment is a half day meeting occurring one day prior to the 5th Immunotherapeutics & Immunomonitoring Conference.

Network with clinical immunologists, pathologists, and pharmacologists, as well as practicing clinicians and R&D scientists to discuss the newest developments in the field. Leading experts will present novel findings and discoveries in the constantly changing area of immunotherapy, as they relate to the tumor microenvironment.

The workshop speakers consist of: Jose Guevara-Patiño, Associate Professor at Loyola University; Claudia Palena, Investigator at National Cancer Institute; Pavel Pisa, Head of Translational Medicine at Roche Glycart AG; Farbod Shojaei, Principal Scientist at Pfizer; and Judith Varner, Professor at University of California San Diego.

This half day workshop on Jan 30 is also part of the 2nd Novel Immunotherapeutics Summit, which consists of four concurrent conferences which begin on Jan 31, 2013 shown below.

2nd Novel Immunotherapeutics Summit:
- Workshop: Immune Responses in Tumor Microenvironment
- Track: 5th Immunotherapeutics & Immunomonitoring
- Track: 11th Cytokines & Inflammation
- Track: 2nd Allergy & Respiratory Drug Discovery
- Track: Immunotoxicity & Immunogenicity
